-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4-7, are rejected under 35 U.S.C 102(e) as being anticipated by Putcha et al. (US 2005/0148349, filed 12-19-2003, hereinafter Putcha).

Regarding claim 1, Putcha discloses a method for implementing system information changes in a mobile communication systems, the system comprising a network of plurality of cells and at least one user equipment (110, fig. 1), the method comprising, in the user equipment device: causing the user equipment (110, fig. 1) to read Master Information Block of the broadcast system information when the user equipment has configured a Paging Channel (PCH), or Forward Access Channel (FACH) after cell selection and when the Master Information Block indicates a change in the system information, acquiring the updated system information (paragraphs: 0011-0014; 0017; paragraph: 0020; figs. 1-3).

Regarding claims 4-7, Putcha further teaches the following: reading Master Information Block of the broadcast system information and detecting system information changes comprises reading and processing the Master Information Block, apparatus for implementing system information changes broadcast in a mobile communication system

Art Unit: 2614

comprising a network of a plurality of cells and at least one user equipment device (110, fig. 1) being arranged in use, to implement the method of any of claims 1 to 4, program code for performing the steps of any claims 1 to 4, program code stored on a computer readable medium for performing the method of any of claims 1 to 4 (paragraphs: 0011-0014; 0017; paragraph: 0020; figs. 1-3).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Putcha in view of Rimhagen et al. (WO 00/72609, hereinafter Rimhagen).

Putcha differs from claim 3 in not specifically teaching the following: the user equipment is arranged to read Master Information Block at intervals until expiry of a maximum possible system information change deferral time.

However, Rimhagen teaches the following: the user equipment is arranged to read Master Information Block at intervals until expiry of a maximum possible system information change deferral time (fig. 13, page 22, line 12 – page 23, line 2; page 25 lines 1-7; and claim 27).

Thus, it would have been obvious to one of ordinary skill in the art at the time invention was made to modify Putcha's system to provide for the following: the user equipment is arranged to read Master Information Block at intervals until expiry of a

Art Unit: 2614

maximum possible system information change deferral time as this arrangement would facilitate saving use of system resources frequently and there by making system use more efficient as taught by Rimhagen.

Response to Arguments

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
